

Energy Policy of Liberty Galați

We are the largest integrated steel plant in Romania and leader in manufacturing steel products. Liberty Galați manufactures a wide range of products, in compliance with national and international quality certified standards as well as the customer specifications, being guided by our values: family, sustainability and change.

Our **Energy Management System (EnMS)** totally respects the requirements of ISO 50001:2011 and, through this policy, we affirm the conformity towards the obligations incumbent on us from the legislation of Romania and of the European Union, regarding the products manufactured under conditions of Energy Efficiency.

Our engagements

- 1. To permanently save any type of used energy** and maintain the ISO 50001 certification for the Energy Management System
- 2. To act in accordance with all legal and related requirements** in the Energy field
- 3. To continuously improve our Energy Management System** and the Energy performance of our own operations

Our Energy objectives

- 1. To minimize the consumption of fossil fuels**, through a permanent optimization of the process parameters;
- 2. To reduce the Energy costs**, through its proper systematic management;
- 3. To ensure the availability of all information and resources necessary** to achieve the objectives and targets;
- 4. To invest** in innovative, efficient technologies, both energy and economically and ecologically;
- 5. To support** the acquisition of energy efficient products and services and the adequate design for improving the energy performance;
- 6. To act** continuously for the maximum utilization of the fuel gases resulting from the steel technological processes, in order to use the primary energy sources to a minimum;
- 7. To assume** the responsibilities that lie with us regarding a sustainable development, by applying measures of Energy Efficiency and capitalizing on all Energy sources, by minimizing the losses of Energy, including through the burned gases, in order to reduce our own footprint of greenhouse gas emissions;
- 8. To promote the partnership principle** in our relations with suppliers, in order to maximize the intrinsic energy properties of our steel products;
- 9. To involve our own employees and contractors**, by continually improving the level of knowledge, qualification and awareness regarding the need / ways to reduce the consumption of Energy in their daily, personal and service activities;
- 10. To permanently demonstrate our position as a regional leader in the field**, being a reference in the industrial sector through our approach regarding the optimization of Energy consumption.

Bogdan Ioan Grecu
